IMPORTANT INFORMATION

DIMENSIONS

Nominal dimensions for all Original Style glass tiles are shown throughout the brochure. Owing to their hand-finished character, actual dimensions for individual tiles will vary from these figures. However, this is the number of tiles you will need per square metre or square foot. In addition, we recommend you allow for at least an additional 5% for cutting/wastage.

Tile area calculations:

48 x 48mm (1⁷/₈" x 1⁷/₈" tiles
- 20 tiles per linear mtr; 6.4 per linear ft

100 x 100mm (4" x 4") tiles
- 100 tiles per sq mtr; 9 per sq ft

152 x 50mm (6" x 2") tiles
- 7 tiles per linear mtr; 2 per linear ft

152 x 152mm (6" x 6") tiles
- 44 tiles per sq mtr; 4 per sq ft

198 x 198mm (7⁷/₈" x 7⁷/₈" tiles
- 25 tiles per sq mtr; 2.3 per sq ft

200 x 40mm (7¹⁵/₁₆" x 1⁵/₈" tiles
- 3 tiles per linear mtr; 1.5 per linear ft

398 x 198mm (15³/₄" x 7⁷/₈" tiles
- 12.5 tiles per sq mtr; 1.2 per sq ft

Please note: All of the above dimensions are subject to a tolerance of $\pm 2.5\text{mm}$ or $\frac{3}{32}"$

SHADING

As each tile is individually coloured, there may be distinctive yet subtle variations in shade. This is an inherent feature of Original Style's glass tiles. You may wish, therefore, to spend some time to achieve the most pleasing distribution of shades before fixing. Each decorative tile is handmade therefore uniquely individual. When planning designs it is important to dry lay the tiles prior to fixing. Due to the different density, 5mm and 10mm tiles will vary in tone.

INSTALLATION

As with any other glass product, ensure Glassworks tiles are handled with care, in particular, where tiles are being cut or have been broken. Please ensure that the surfaces do not come into contact with each other or sharp/abrasive objects. Appropriate safety precautions should be taken if cutting glass, including protective equipment for hands and eyes.

Original Style glass tiles are not recommended for exterior use.

Other Original Style products, such as ceramic tiles and stone, which are shown in this brochure, have their own installation requirements. Please ensure you refer to the relevant Original Style brochure for these products before installing.

Adhesive must be applied evenly due to the transparent nature of some tiles. Failure to do this can lead to the adhesive being visible through the tiles in certain light. This applies in particular to the decorative and mosaic ranges.

For glass tiles, in particular, before commencing installation it is important to read the **Glassworks Installation Guidelines – Fixing and Cleaning Instructions** (applicable in the United Kingdom only).

In the USA please follow the recommendations of a reputable adhesive manufacturer and always comply with American National Standards Institution (ANSI) specifications as set out in the **Handbook for Ceramic Tile Installation** published by the Tile Council of America.

IMPORTANT INFORMATION

GROUTING

Particular care should be taken to use the correct grout. Read carefully and follow the manufacturer's instructions.

Original Style does not recommend using coloured grouts unless the adhesive supplier has stated that the coloured grout is suitable for use with glass tiles.

Original Style would recommend a grout space of approximately 2mm for the plain and mosaic glass. Due to the handmade nature of the decorative glass it is imperative to dry lay the tiles before fixing to establish correct grout spacing. We recommend an approximate distance of 2 - 3mm.

EQUINOX TILES

Colour and patina vary within this range and should be considered when installing.

Avoid slurry grouting these tiles, finger grout around the tile to avoid getting the grout in the patina.

IRIDESCENT DROP-IN TILES

Due to production methods used in creating this range it is important to use a thicker/stiffer consistency of grout to avoid leaching between tile layers.

Colour variation is inherent with these tiles which should be considered when planning your tiling.

The clear Drop-in tiles can be fixed either side. It is therefore important to achieve the desired effect before fixing.

Additionally, please note the level of reflectivity can be influenced by the depth of grout, test before fixing to achieve the desired effect.

CLEANING

Wash down glass tile surfaces with clean water or a normal spirit, glass or window cleaner. Please ensure a soft cloth is used to avoid scratching.

SCRATCHING

As with all glass products, glass tiles can be scratched. We recommend that care is taken in installation and that glass tiles are not put in high-risk areas for scratching.

USE OF GLASS TILES ON COUNTER TOP SURFACES

Original Style does not recommend glass tiles are used on counter tops, see Scratching above.

USE OF GLASS TILES NEAR HEAT

Original Style recommends tiles are installed a minimum of 3cm from any heat source. This will include any hot water pipe-work concealed within walls and any radiant heat sources such as heated towel rails or radiators.

PHOTOGRAPHY

Owing to variations in studio lighting and printing inks, the tile colours shown in this catalogue may differ slightly from those of the actual tiles. Before making your choice it is always advisable to ask your Original Style retailer to show you samples.

LIMITS OF LIABILITY

Original Style accepts no liability for the faulty installation of its tiles. In the case of any claim relating to the tiles themselves, Original Style's liability, to the extent permitted by law, is limited to the purchase of the product and does not extend to consequential loss. Claims cannot be considered after the tiles have been installed.

Original Style warrants that its tiles conform to their description and are fit for their purpose.

The company makes no other express or implied warranty as to fitness or merchantability. We extend no guarantees, express or implied, as to wear resistance or maintenance procedures.
